Many Inane Get Away from Grounds at Dunning During Confusion But All Are Safely Rounded up—An Overheated Boiler Is Blamed

CHICAGO, Dec. 26.—Seventeen patients of the Chicago State hospital for the insane at Dunning are known to have been burned to death or destroyed a frame which destroyed a frame structure used as a dormitory for tubercular patients tonight.

About 600 patients were in the building when the fire broke out. About fifty of the patients left the hospital grounds during the confusion. Many of them returned and were rounded up by passing motorists and returned to the building which contained seven hundred patients.

A woman whose body was taken out of the ruins, is believed to be the only one who was not burned to death.

At least three others are believed to have perished.

Attorneys said that possibly a stove had exploded but believed the fire was caused by an overheated boiler in the frame annex where the flames burst through.

Many of these killed are believed to have been burned to death while the patients were being moved to a building across the street.

When the fire was first noticed by attendants, the institution was first alerted and the institution was first alerted and the institution was first alerted.

Attendants were hurriedly formed into lines and marched from the building with little confusion, some carrying patients in their arms.

Attendants attributed the fact that only the very mild cases were confined in the annex and were easily controlled.

Firemen estimated the loss at \$100,000.

Six Bed-Rooms

Attendants carried out bed-ridden patients from one of the wards. A number of patients were killed and finally took refuge in a lavatory where they were killed.

PARIS, Dec. 26.—France's budget for next year, submitted to the Senate today, shows a surplus of 650,000 francs. The receipts are 15,100,000,000 francs and the expenditures of 14,450,000,000 francs.

The favorable balance is obtained by a steady increase in tax collection, attributed chiefly to the activity of business through low exchange, which is tending to increase exports.

The expense includes about 200,000,000 francs in increased living allowances for government employees in account of the high cost of living.

Mr. Berenger, reporter for the Finance commission, directed the government's attention to the rising living costs and the necessity of doing something to prevent the depreciation of which is regarded as the chief of the financial evils.
